Objective: A portal showing job information from Tecky Partners for graduates

Tech: GitLab OAuth · Database · React

Login

As Tecky, I want the graduate login via Gitlab so the site is protected

Read Jobs

As a graduate, I want to see what jobs are available for me to apply so I dun have to ask one by one

As a graduate, I want to see the information of the company so I can evaluate if the company is good

Apply Job

As a graduate, I want to apply for the job directly with one-click so I dun have to do much

Status Update

As a graduate, I want to update my status so I may be noticed by Tecky that I am still looking for a job

Upload Jobs

As a Tecky staff, I want to easily upload jobs referral so I dun have to announce it one by one

As a Tecky staff, I want to post a job referral without a job description so I can post the referral from some lazy employer too

As a Tecky staff, I want to post a job ad even if the company is not a partner so I can refer some jobs that I think it suits the graduates

Send applied students' CVs

As a Tecky staff, I want to send the CV of the graduates to the job referral so I can save my time of typing emails manually
